### What's new at DXC Technology

## NelsonHall names DXC a leader in Property and Casualty Operations Transformation

DXC Technology was recognized by analyst firm <u>NelsonHall</u> as a **Leader**, its highest designated ranking, in three market segments in its NEAT evaluation for 2022. DXC's capabilities were positioned as a Leader in:

- > New Business Setup/Underwriting Capability
- > Customer/Distribution Service Administration Capability
- > Claims Administration Capability

Leaders are vendors that exhibit both a high capability relative to their peers to deliver immediate benefit and a high capability relative to their peers to meet future client requirements.

NELSONHALL P&C OPERATIONS TRANSFORMATION REPORT

# DXC and Manchester United are partnering to enhance its digital offering to fans

DXC is proud to partner with Manchester United as the team's <u>technology partner</u>, DXC will work with United to improve the way its 1.1 billion fans around the world engage with the club, as well as to enhance its daily business operations.

DXC will also help Manchester United become more data-driven, harnessing the power of data and analytics technologies across all aspects of the club.

## Newsroom and Customer Success stories

### Newsroom

The DXC Technology Newsroom is your resource for the latest news, press releases and corporate information.

## **The Assure Claims Academy**

The Assure Claims Academy portal went live on June 10, 2022. This portal is accessible via the Claims Microsite and can be used to self-assess one's knowledge, and know-how, of the DXC Assure Claims application with utmost ease.

Assure Claims

### Uses of the Assure Claims Academy

### The Assure Claims Academy portal:

- > Offers Numerous quizzes or tests
- Can be used to evaluate your know-how of the various features and functionalities from across the different zones of DXC Assure Claims
- Acts as an excellent skill & knowledge assessment tool for Customers of DXC Assure Claims, and Employees of DXC Technology.

### Watch the video below to know more about the Assure Claims Academy.

## Introduction to API based Data Exchange Tools and Prerequisite Settings

THIS SECTION CONTAINS A BRIEF INTRODUCTION TO THE API BASED DATA EXCHANGE TOOLS AND THE PREREQUISITES FOR USING THEM

"

<

PREVIOUS SECTION

NEXT SECTION

## Introduction to API based Data Exchange Tools and Prerequisite Settings

## Introduction to API Based Data Exchange Tools

DXC is strategically working towards creating an API based Import/Extract Tool which would negate dependencies on SAP interfaces requiring additional licensing.

The table below shows the release calendar for the new API based Data Exchange tools:

Name of Module	Assure Claims version GA
MBR	22.3
PositivePay	22.3
1099	22.4 (forthcoming release)

Note

- > SAP configuration will no longer be required to run the new API based Import/Extract tasks.
- The new API based Data Exchange solutions will only be accessible via the Configuration Manager zone.
- The respective DA SAP based modules (in the Utilities zone) will not be supported simultaneously with the new API based solution (in the Configuration Manager zone). Thus, with the release of DXC Assure Claims v. 22.3, MBR and PositivePay will no longer be available through the old task manager in the Utilities zone.
- It is imperative that all the prerequisite settings are performed to get the new API based Data Exchange modules functional.

## **Prerequisite Settings**

The following one-time settings need to be done in the Configuration Manager/Utilities zones to perform Data Import/Extract operations. It is imperative that these settings be performed in the exact order mentioned below.

1. Select the checkbox labeled Use Rule Engine under General System Parameters.

- A License Key will need to be entered to enable the checkbox labeled Use Rule Engine.
   Please contact Assure Claims Support Helpdesk for assistance.
- There are no additional costs associated with generating a License Key for enabling the Rule Engine feature

If you're using the Configuration Manager, navigate to Use Rule Engine checkbox as shown in [Fig. 1]

	D	XC Assure	e Claims (Con	figuration Man	ager) screen

## 2. Mandatory requirement of a Database Server (either PostgreSQL or MongoDB) for all API based tools

A small **Database Server** (either **PostgreSQL** or **MongoDB**) must be installed to act as a **Staging** area for all **Data Import Tools**.

- The PostgreSQL software may be downloaded on the Application Server itself or any other server on the same network. However, it must be ensured that direct connectivity to the Application Server is always maintained. A cloud-based service may also be used for the same
  - <u>https://www.enterprisedb.com/downloads/postgres-postgresql-downloads</u>
- Customers hosted with DXC may please contact the Assure Claims Support Helpdesk to get PostgreSQL installed
- > Any version of PostgreSQL (13.9 or higher) may be installed for your Operating System
- Please keep the connection information handy before proceeding with the next steps

#### An example of a Staging Connectionstring

ID=<UserID>;Password=<password>;Server=localhost;Port=5432;Integrated Security=true;Pooling=true;

### Note

- Enter the 'UserID' and 'password' used during PostgreSQL setup
- If PostgreSQL is installed on the Application Server, then Server should be left as "localhost". Else, enter the server's name where PostgreSQL has been installed
- The default PostgreSQL Port is 5432, however if a different port is used, please enter it accordingly
- 3. Select the checkboxes Use Import Tool and Use Extract Tool in the Configuration Manager Zone

Navigate to the Import/Extract Tool subtab:

And select the checkboxes labeled Use Import Tool and Use Extract Tool. [Fig. 3]

[Fig. 3]

The File Location dropdown field has 3 options:

- Shared
- > SFTP
- S3 (AWS Storage)

When the selected **File Location** is **SFTP**, then the following fields will be displayed:

- Server
- User ID
- Password
- Folder Location

- Import Tool Database Type\*
- Import Tool Staging Database\*
- Staging Connectionstring\*

When the selected File Location is S3(AWS Storage), then the following fields will be displayed:

- File Path\*
- S3 Bucket Name\*
- ➢ S3 Access Key
- S3 Secret Key

- S3 Region\*
- Import Tool Database Type\*
- Import Tool Staging Database\*
- Staging Connectionstring\*

When the selected File Location is Shared, then the following fields are displayed:

- Shared Location
- Import Tool Database Type\*

- Import Tool Staging Database\*
- Staging Connectionstring\*

### **File Location**

- This location will be used to place the Import Files as well as get the Extracts from DXC Assure Claims
- A network shared path such a SFTP or S3 may be chosen by entering the necessary details

### Import Tool Database connection details

- Appropriate details for connecting to the Staging Database Server will need to be entered
- > The term "ImportPackage" must be entered in the Import Tool Staging Database field
- Please make sure that Staging Connectionstring is accurate before proceeding to next steps
- 4. Select the checkbox labeled API Flexible Searches, in the Security zone

Navigate to the Security Management System screen and turn ON the "API Flexible Searches" for the user who would schedule the Task Manager Jobs. [Fig. 4]

### 5. Download Microsoft OLE DB driver

To run the Import tool for MDB file to support modules such as MBR, Microsoft OLE DB Driver must be installed in the Application Server.

Download the Microsoft OLE DB driver below:

IMPORTTOOL.PKG	EXTRACTTOOL.PKG
----------------	-----------------

Downloadable "PACKAGES" were first introduced in release version 18.3. To know more about PACKAGE download and their import into DXC Assure Claims (formerly RISKMASTER Accelerator/DXC Insurance RISKMASTER<sup>™</sup>), please click on the adjoining Release Notes document and refer to pages 15 and 22 for details.

READ THE RELEASE NOTES FOR VERSION 18.3

## Availability of API Based Data Exchange Tools in DXC Assure Claims

THIS SECTION CONTAINS DESCRIPTIONS OF ALL THE API BASED DATA EXCHANGE TOOLS FOR WHICH THE NEED OF SAP INTERFACES HAS BEEN NEGATED

## API Based Data Exchange Tools in Assure Claims

## **MBR** Import

To schedule an MBR Import job, go to Configuration Manager  $\rightarrow$  Task Manager  $\rightarrow$  Scheduler section  $\rightarrow$  Job Details  $\rightarrow$  and schedule a Task by selecting MBR as Task Type and Import Tool as Sub Task Type.

Enter required data in the StartDate /End Date and Job Scheduler section. Next, enter the frequency of job execution in Job Scheduler to get redirected to the OptionSet Parameters tab. [Fig. 5]

### **DXC Assure Claims screen**

[Fig. 5]

The Optionset Parameters tab includes 4 sub-sections namely, Option Set Information, Entity Match Settings, Payment Options, Fee Payments. Enter relevant data in the respective fields of each section. Based on the selections made on this screen, the task will be scheduled. The created task will be displayed on the Jobs section of the Claim Scheduler screen. [Fig. 6] For complete information on MBR Optionset Parameters, please refer to the **DA MBR Optionset User Guide document on the Claims Microsite**  $\rightarrow$  DXC Assure Claims Release Info  $\rightarrow$ Data Analytics  $\rightarrow$  DE Modules Optionset User Guides  $\rightarrow$  MBR

				IT:- C1				

To edit the scheduled job, select the clickable link to get redirected to the respective screen. To remove the same, select the corresponding checkbox, followed by the **Delete** button from the top right corner.

### Note

With the new API based MBR Import solution, the need to create a Reserve prior to importing a payment has been resolved. You can now Import Payments without Reserves as the system will automatically create the required Reserves in the background

## **MBR Extract**

To extract for an MBR (Medical Bill Review), go to Configuration Manager  $\rightarrow$  Task Manager  $\rightarrow$  Scheduler section  $\rightarrow$  Job Details. Mentioned below are the various fields pertaining to it are mentioned below.

Schedule a Task with the **Task Type – MBR** and **Sub Task Name - Extract**. Secondly, enter required data in the **StartDate /End Date** and **Job Scheduler section**. Next, in the **Medical Bill Review** → **Optionset Parameters** tab, enter a unique name for the **Optionset** and select **Export Type**. [Fig. 7]

To edit the scheduled task, select the clickable link to get redirected to the respective screen.

#### Note

While the Task Manager screen of the MBR Extract Tool has been completely redesigned and given a modern look and feel, its functionality has not been altered.

- The details of an existing MBR Extract job will be prefilled in the respective fields if the same task is created again.
- > The data will be auto populated based on the selected Task Type and Sub Task Name.

## **PositivePay Import**

Go to Configuration Manager > Task Manager > Scheduler section. This section features two tabs, namely, Job Detail and OptionSet Parameters. In the Job Detail tab, schedule a Task with the newly added Task Type – PositivePay and Sub Task Type – Import. Next, enter relevant data in the fields of the OptionSet Parameters tab and select Save.

## **PositivePay Extract**

The Job for the PositivePay Extract tool can be scheduled and executed like any other job. For this, go to **Configuration Manager**  $\rightarrow$  **Task Manager**  $\rightarrow$  **Scheduler section.** This section features four tabs, namely,

In the **Job Detail** tab, schedule a Task with the newly added **Task Type – PositivePay** and **Sub Task Type – Extract**. In the following tab, enter select the required **Start Date** and **End Date**. Next, enter the frequency of job execution in **Job Scheduler** to get redirected to the **OptionSet Parameters** tab.

To edit the scheduled task, select the clickable link to get redirected to the respective screen.

### Note

- While the Task Manager screen of the PositivePay Extract Tool has been completely redesigned and given a modern look and feel, its functionality has not been altered.
- The details of an existing PositivePay Extract job will be prefilled in the respective fields if the same task is created again.
- > The data will be auto populated based on the selected Task Type and Sub Task Name.

## 1099-MISC and NEC Extract (phase 1)

The dependency on SAP tool for extracting 1099 has also been done away with by introducing a new task named, 1099-MISC And NEC in the Task Manager of the Configuration Manager zone.

With this integrated solution, the 1099 details can now be retrieved through an Extract tool without the involvement of SAP configuration. The 1099 form is used to report non-employment income to the Internal Revenue Service (IRS).

To extract the same, go to Configuration Manager > Task Manager > Scheduler section. In the Job Detail section, schedule a Task with the newly added Task Type – 1099-MISC And NEC. Enter relevant data in the fields of the Start Date/End Date and Job Scheduler tab.

Next, select necessary filter criterion in the Optionset Parameter section. [Fig. 13]

	DXC As	ssure claims screen		
Manager >				
Dashboard	Jobs C <sup>+</sup> Scheduler			
				٩
Job Detail	2 Start Date / End Date	3 Job Scheduler	4 OptionSet Parameters

Running	0	099-MI	SC And	DA_1099-MISC And	Completed	08/28/2022 5:49 PM	08/28/2022 5:49 PM	B		1
Task List	0	1099-MI	SC And	DA_1099-MISC And	Completed	08/25/2022 6:39 AM	08/25/2022 6:39 AM	8		
					[Fig. 14]					

#### Note

- > The complete 1099-MISC and NEC Extract feature will only be available in release version 22.4.
- 1099 extraction is available in the Task Manager of the Utilities as well as the Configuration Manager zone. However, when accessed via the Utilities zone, the job will be executed through DA SAP tool. On the Configuration Manager zone, the job will be executed through the integrated API approach.
- As of now, the new 1099 Extract does not facilitate filtering Box 6 records-based Entity Type. Furthermore, extensive logging in and filtration based on the option - Ignore Tax ID Errors is not supported by the functionality.
